

JOHN WREXEL ANTOPINA

Pajac, Lapu-Lapu City, Cebu | 0962 602 4717 | jw.antopina@gmail.com | Github: github.com/Derozanrex19

PROFESSIONAL SUMMARY

Detail-oriented Information Technology graduate with hands-on experience in web development, AI automation, and machine learning systems. Proven ability to develop real-time applications, manage projects, and apply emerging technologies in practical environments. Experienced in social media technology deployment, prompt engineering, and system development, with strong problem-solving and collaboration skills. Seeking an entry-level role in software development, AI, or IT systems.

WORK EXPERIENCE

Intern — Lifewood Data Technology

January 2026 – Present

- Promoted company initiatives through multi-platform social media campaigns under the Pearl27 project
- Applied prompt engineering techniques to support AI-related workflows and automation
- Contributed to development of web-based and system-driven projects
- Assisted in AI automation processes to improve operational efficiency
- Participated in game development and interactive applications
- Collaborated in project planning, coordination, and execution across distributed teams
- Continuously explored and implemented emerging technologies in real-world applications

Customer Service Representative — Amazon

July 2024 – December 2024

- Resolved customer concerns related to orders, payments, and deliveries
- Performed troubleshooting for devices and services
- Simplified technical issues for non-technical users
- Maintained strict adherence to SOPs and data privacy standards

PROJECTS

PosturEase – Real-Time Posture Recognition System (Capstone Project)

- Developed a real-time posture detection system using MediaPipe Pose and machine learning
- Integrated system using Flask framework for backend processing
- Served as Project Manager, overseeing development workflow and team coordination
- Conducted dataset collection and labeling for posture classification
- Produced technical documentation and system design artifacts

Smart Movie Picker –Movie Recommendation Web App

- Engineered a **personalized movie recommendation engine** based on user mood, time availability, energy level, genre preferences, and regional filters
- Designed a **custom weighted scoring algorithm** combining genre matching, runtime optimization, energy profiling, popularity bias, and quality metrics to rank candidates
- Integrated **TMDB REST API** with parallel multi-query fetching, pagination handling, retry logic, and fallback to a curated offline dataset
- Created a **cinematic, responsive UI** with Tailwind CSS and Framer Motion, focusing on smooth animations and zero-friction UX
- Deployed via **Vercel** with environment-based configuration and optimized static build output
- Utilized modern AI-assisted development workflows to accelerate iteration, debugging, and feature implementation

Tech Stack: React · TypeScript · Vite · Tailwind CSS · Framer Motion

TECHNICAL SKILLS

- Web Development (HTML, CSS, Flask)
- AI Automation & Prompt Engineering
- Machine Learning (Basic Implementation)
- Game Development (Fundamentals)
- System Integration
- Database Fundamentals
- Project Planning & Management

PROGRAMMING LANGUAGES

Python | HTML | CSS | React | TypeScript

SOFT SKILLS

Problem Solving | Technical Communication | Team Collaboration | Adaptability | Research & Analytical Thinking

EDUCATION

Bachelor of Science in Information Technology

University of Cebu Lapu-Lapu and Mandaue | August 2022 – Present

CERTIFICATIONS

CCNAv7: Switching, Routing, and Wireless Essentials

Cisco Network Academy
